# Muneeb Ur Rehman

Muneeb077 | Muneeb130779 | Portfolio | murehman077@gmail.com | (709) 632 9724

## EDUCATION

**Bachelor of Science in Computer Science** **Jan 2022 – Aug 2025**
Memorial University of Newfoundland **GPA:** 3.80/4.0

**Honors & Awards:**
Faculty of Science Dean's List 2022–24

## WORK EXPERIENCE

**Software Developer** **January 2026 – Present**
Voronoi Health Analytics, Vancouver, BC

- Built the automated test suite for CAST 5.0, an external release: **65** unit tests in **C++** with **Google Test**, plus integration tests, reaching **100%** % % % code coverage across 2 repositories.
- Integrated the tests into the **GitLab CI pipeline**, so that every change is tested automatically instead of through manual test cycles.
- Designed a scalable pipeline bridge, now used by 2 repositories, that lets any repository adopt the same **CI/CD pipeline** without duplicating setup.
- Tested CAST 4.6 and 4.7 through internal release, finding and reporting several crash-causing bugs.

**Research Assistant** **May 2023 – December 2025**
DIAG Lab, Memorial University, St. John's, NL

- Conducted **image inconsistency detection** and **data validation** to enhance diagnostic reliability and workflow efficiency.
- Executed manual annotation and data preprocessing to improve downstream ML model accuracy.
- Supervised regional team operations to ensure accuracy, project adherence, and data integrity.

## PROJECTS

**MailPilot**
- Built a full-stack SaaS platform integrating with Gmail for seamless email sync, sending, and receiving.
- Developed a performant and responsive UI using **Next.js**, **React**, and **TypeScript**.
- Implemented webhooks to automate and accelerate email synchronization by **75%**, enhancing real-time performance.

**Stock Trade Platform**
- Developed a **real-time stock trading platform** using **React**, **Node.js**, **Express**, and **MongoDB**.
- Implemented **secure authentication** with **OAuth** and **bcrypt**, integrating live stock market APIs.
- Designed interactive dashboards with **data visualizations** for portfolio and investment insights.

**HomeNest**
- Built a full-stack marketplace to buy, rent or book stays across **50,000** listings, with map search and dashboards for guests, hosts and admins.
- Used MySQL stored procedures and triggers to prevent double bookings, make sales atomic and keep an append-only audit log.
- Encrypted personal data at rest. The site handled 300 concurrent test users with 0 failures and an **8 ms p95**.

## SKILLS

**Programming Languages:** JavaScript, TypeScript, Python, C++
**Frontend:** React, Next.js, Vite, Tailwind CSS, HTML5, CSS3
**Backend:** Node.js, Express.js, Flask
**Databases:** MongoDB, PostgreSQL, MySQL, SQLite, Shelve, Prisma
**DevOps / Tools:** Git, GitHub, Azure DevOps, RESTful APIs, OAuth, GTests, GitLab CI, Redis, Docker
